

Anticipated Schedule:

2 years for design and construction (open 2012)

Estimated Funding Needed:

\$3,000,000

Description:

Project includes the extension of the third northbound lane along GA 400 approximately 0.75 miles to improve the transition from the existing four-lane northbound section that terminates south of McFarland Parkway to the two-lane section that extends toward SR 20. The proposed three-lane section will address the merging bottleneck of GA 400 northbound traffic near McFarland Parkway, thus improving travel times along the corridor.

Note: Final project descriptions are subject to the development process and environmental clearances.

E. GA 400 NB 3rd Transition Lane Extension at McFarland
