

GA 400 Corridor Improvement Projects

Anticipated Schedule:

ITS = 2 years for design and construction (open 2012)
HERO = 1 year (implemented 2011)

Estimated Funding Needed:

Capital = \$1,889,000
Operations = \$110,000 per year x 8 years = \$880,000

Description:

Project will expand Intelligent Transportation System (ITS) coverage from McFarland Parkway to SR 20. ITS uses advanced information and communications technology to improve mobility and safety. Some examples of current ITS technology in use around the state include the Georgia Navigator system, traveler information on 511, changeable messages signs that alert drivers of upcoming traffic issues, ramp meters, and cameras / video detection. Highway Emergency Response Operator (HERO) units that respond to incidents and clear the road so that traffic can proceed as normal will be expanded as well.

Note: Final project descriptions are subject to the development process and environmental clearances.

F. GA 400 ITS/HERO Expansion from McFarland to SR 20
